Ho Chi Minh Industry and Trade College
09/2022 - 12/2025
Major: Information Technology
GPA: 7.94/10

LANGUAGE

English: Vstep A2

ABOUT ME

I am a passionate IT graduate, enthusiastic about Full-Stack development, proficient in front-end technologies such as HTML, CSS, JavaScript, ReactJS, and back-end development using C# and ASP.NET. In the next 6 months, I aim to enhance my skills in building websites and applications, optimizing system performance, and managing databases. In the next 3-4 years, I aspire to become a skilled Full-Stack developer, creating efficient web and application solutions while applying modern technologies to improve productivity and user experience.

WORK EXPERIENCE

Saigon Precision Company Limited — 06/2025 - 12/2025

Project Description
- Contributed to developing and improving internal web and desktop applications, delivering new features and enhancing overall performance and UX.
- Built a web-based error lookup tool and supported testing, debugging, and feature optimization.

Team Size
- 3–4 members (Developers, Team Lead).

My Position
- Intern Developer (Web & Desktop).

Responsibilites
- Updated and developed UI using ReactJS, HTML5, CSS3, JavaScript.
- Built and maintained a management app with WinForms, C#, SQL Server.
- Integrated RESTful APIs and implemented CRUD operations.
- Assisted with testing, debugging, and performance improvements.
- Provided basic help desk support and logged issues.
- Developed a web-based error lookup tool to improve efficiency.

Technologies Used
- Frontend: ReactJS, HTML5, CSS3, JavaScript.
- Backend / Desktop: C#, .NET, WinForms, SQL Server, Oracle.
- Others: RESTful APIs, Git, IIS, Docker, Debugging Tools.

E-commerce Website — 03/2024 - 06/2025

Project Description
Developed a full-featured mobile phone e-commerce website with complete shopping, order management, and online payment functionalities. The system supports user order tracking and includes an admin dashboard for managing products and orders. Integrated MoMo online payment for secure transactions.

Team Size
- 2 members.

My Position
- Frontend Developer.

Responsibilites
- Developed responsive user interfaces using HTML, CSS, JavaScript, and ReactJS.
- Implemented core e-commerce features such as product listing, shopping cart, checkout, and order tracking.
- Integrated frontend with backend APIs and handled data rendering.
- Optimized UI/UX and ensured cross-browser compatibility.
- Collaborated with backend team to deliver a complete e-commerce solution.

Technologies Used
- Frontend: HTML, CSS, JavaScript, ReactJS.
- Backend: Node.js, Fastify.
- Database: MySQL, Xampp.
- Payment Integration: MoMo Payment Gateway.
- Others: RESTful APIs, JSON, GitHub, Debugging Tools.
